NB: the figures used are from the Kenya Domestic Observers Forum (KEDOF), the Kenya Television Network (KTN, as announced) and the Electoral Commission of Kenya (ECK, as released to the United Nations Development Programme, UNDP). As KEDOF has been harmonising its figures with the those of the ECK, its possibilities for providing an independent counter-check are limited. KTN stopped releasing figures towards the end of the process. And no less than the ECK Chair has disclaimed the ECK's figures. The point of showing all three sources here, therefore, is merely to highlight where and how the anomalies, malpractices and illegalities noted by the domestic election observers may have altered outcomes. Clearly, there is need, as Kenyans for Peace with Truth and Justice (KPTJ) has consistently stressed, for an independent investigation and audit into the counting and tallying of the Presidential vote.
